Welcome to PE Points

Welcome to our inaugural *PE Points* quarterly newsletter, bringing you the latest legal insights and important news to keep you up to date on the ever-evolving private equity landscape.

The headline in the PE world is of course “uncertainty” with the unprecedented and unpredictable geopolitical events that are unfolding seemingly by the day. However, a key theme is emerging: investors are no longer waiting for instability to subside. Instead, they are actively incorporating risk and volatility into their planning and transactions. This proactive stance helps explain why there is still cause for optimism in the private equity sphere.

In this issue, Osler’s Private Equity team covers a wide range of important topics from practical negotiation tips and know-how to the latest trends in deal structuring. We also feature an industry spotlight that highlights positive signals within the current Canadian private equity market.

If you would like to discuss one of these items, or a PE-related transaction you are considering, please reach out to us, and if there is a topic you would like us to cover in a future newsletter, we would love to hear from you.
