Privacy and Data Management

Joanna is a member of the Privacy and Data Management group. She provides practical and strategic privacy compliance advice to organizations across all sectors, from large multi-national companies to emerging companies.

Joanna regularly assists clients in identifying and managing privacy risks associated with complex and innovative data collection and use initiatives, including interest-based advertising, "big data" analytics, AI, surveillance technologies, and anti-fraud initiatives. Joanna also assists clients with security incident response and privacy regulatory investigations, including liaising with federal and provincial privacy regulators in Canada.

She regularly provides privacy and anti-spam training to clients, drafts privacy policies and procedures, conducts privacy reviews, and advises on privacy issues in mergers and acquisitions and outsourcing arrangements (including transborder data flows).
