Chapter 5

Canada

Osler, Hoskin & Harcourt LLP

1 Relevant Legislation and Competent Authorities

1.1 What is the principal data protection legislation?

PIPEDA governs the inter-provincial and international collection, use, and disclosure of personal information.

PIPEDA also applies to organisations that collect, use, and disclose personal information in the course of a commercial activity which takes place within a province. However, PIPEDA will not apply where a province has enacted legislation that has been deemed to be “substantially similar”. The private sector privacy statutes in Alberta, British Columbia, and Québec have each been deemed “substantially similar” to PIPEDA and, as such, PIPEDA will not apply in those jurisdictions. The health privacy statutes in Ontario, New Brunswick, Newfoundland and Labrador have also been deemed substantially similar. (See the response to question 1.3 for information on health privacy legislation in Canada.)

Manitoba has also enacted a private sector privacy statute, entitled the Personal Information Protection and Identity Theft Prevention Act, C.C.S.M. c.P-33.7, but it is not yet in force.

1.2 Is there any other general legislation that impacts data protection?

Canada has also enacted anti-spam legislation entitled An Act to Promote the Efficiency and Adaptability of the Canadian Economy by Regulating Certain Activities that Discourage Reliance on Electronic Means of Carrying Out Commercial Activities, and to Amend the Canadian Radio-television and Telecommunications Commission Act, the Competition Act, the Personal Information Protection and Electronic Documents Act and the Telecommunications Act, S.C. 2010, c. 23 (“Canada’s anti-spam legislation” or “CASL”). (See the response to question 7.1 for details.)

1.3 Is there any sector-specific legislation that impacts data protection?

Yes. Most of the provinces in Canada have enacted health privacy legislation that applies to health information custodians in the context of providing healthcare services. Federal and provincial broader public sector institutions are also subject to public sector privacy legislation.

1.4 What is the relevant data protection regulatory authority(ies)?

The relevant data protection authorities in respect of Canadian Privacy Statutes are as follows: (i) the Office of the Privacy Commissioner of Canada (“OPC”); (ii) the Office of the Information and Privacy Commissioner of Alberta; (iii) the Office of the Information and Privacy Commissioner for British Columbia (“OIPC BC”); and (iv) the Commission d’accès à l’information.

2 Definitions

2.1 Please provide the key definitions used in the relevant legislation:

- “Personal Data”
  “Personal Data” (“Personal Information”) is consistently defined very broadly under Canadian Privacy Statutes as information about an identifiable individual. In essence, information will be deemed to be about an “identifiable individual” where it is reasonably possible for an individual to be identified through the use of that information, alone or in combination with other available information.

- “Sensitive Personal Data”
  “Sensitive Personal Data” is not defined under Canadian Privacy Statutes. PIPEDA specifically provides that “any information can be sensitive depending on the context”.

- “Processing”
  “Processing” is not expressly defined under Canadian Privacy Statutes but, in practice, would include the collection, use, modification, storage, disclosure or destruction of personal information.
3 Key Principles

3.1 What are the key principles that apply to the processing of personal data?

- **Transparency**
  There are both notice and openness/transparency requirements under Canadian Privacy Statutes. With respect to notice, while the specific form and substance varies across Canadian Privacy Statutes, organisations are generally required to identify the purposes for which personal information is collected at or before the time the information is collected. Under the openness and transparency principle under Canadian Privacy Statutes, an organisation must make readily available to individuals specific information about its policies and practices relating to the management of personal information.

- **Lawful basis for processing**
  In general, consent is required under Canadian Privacy Statutes for the collection, use and disclosure of personal information (subject to limited exceptions). Canadian Privacy Statutes contain a general obligation that personal information must be collected by fair and lawful means (i.e., consent must not be obtained through deception, coercion or misleading practices).

- **Purpose limitation**
  See the response to the sections on “Data minimisation” and “Proportionality” below.

- **Data minimisation**
  Canadian Privacy Statutes require that the collection of personal information be limited (both in type and volume) to the extent to which it is necessary to fulfil the purposes identified by the organisation. In addition, personal information must not be used, or disclosed for purposes other than those for which it was collected, except with the consent of the individual or as required by law.

- **Proportionality**
  Canadian Privacy Statutes set out the overriding obligation that organisations may only collect, use and disclose personal information for purposes that a reasonable person would consider appropriate in the circumstances.

- **Retention**
  Each of the Canadian Privacy Statutes contains a general obligation for organisations to only retain personal information for as long as necessary to fulfil the purposes for which it was collected, subject to a valid legal requirement.

4 Individual Rights

4.1 What are the key rights that individuals have in relation to the processing of their personal data?

- **Access to data**
  Under Canadian Privacy Statutes, upon request (and subject to limited exemptions), an individual must be informed of the existence, use, and disclosure of his or her personal information, and must be given access to that information. The exemptions vary among the statutes and need to be carefully considered in providing the right of access to individuals. Examples of the statutory exemptions include, but are not limited to, circumstances where the disclosure might reveal information subject to solicitor-client privilege, confidential commercial information, information that could threaten the life or security of another individual and information generated in a formal dispute resolution process.

- **Correction and deletion**
  Canadian Privacy Statutes require that when an individual demonstrates the inaccuracy or incompleteness of his or her personal information held by an organisation, the organisation must correct the inaccuracies in the information, as necessary.

- **Objection to processing**
  Under Canadian Privacy Statutes, an individual must be able to withdraw consent at any time, subject to legal or contractual restrictions and reasonable notice. Upon receipt of any withdrawal, individuals must be informed of the implications of such withdrawal.

- **Objection to marketing**
  Consent (either express or implied) is required for the collection, use or disclosure of personal information for marketing purposes. As such, individuals must be able to withdraw their consent to the use of their personal information for marketing purposes. (See also the response to question 7.1.)

- **Complaint to relevant data protection authority(ies)**
  Under Canadian Privacy Statutes, individuals have a right to make a complaint to the relevant data protection authority. Individuals must also be able to address a challenge concerning compliance with Canadian Privacy Statutes with the designated individual accountable for the organisation’s compliance. (See also the response to question 6.1.)

4 Other key principles – please specify

Each of the Canadian Privacy Statutes contains specific provisions relating to the safeguarding of personal information. In essence, these provisions require organisations to implement reasonable technical, physical and administrative measures to protect personal information against loss or theft, as well as unauthorised access, disclosure, copying, use, modification or destruction. Canadian Privacy Statutes contain obligations for organisations to ensure that personal information in their records is accurate, complete and up-to-date, particularly where the information is used to make a decision about the individual to whom the information is related or is likely to be disclosed to another organisation.
6.1 Is the appointment of a Data Protection Officer mandatory or optional?

PIPEDA, PIPA Alberta and PIPA BC expressly require organisations to appoint an individual responsible for compliance with the obligations under the respective statutes. Such individuals are typically referred to as the Chief Privacy Officer or Privacy Officer, although Canadian Privacy Statutes do not prescribe any particular title.

6.2 What are the sanctions for failing to appoint a mandatory Data Protection Officer where required?

There are no specific sanctions for failure to appoint a Privacy Officer.

6.3 What are the advantages of voluntarily appointing a Data Protection Officer (if applicable)?

This is not applicable.

6.4 Please describe any specific qualifications for the Data Protection Officer required by law.

Canadian Privacy Statutes do not specify specific qualifications for the Privacy Officer. In recent guidance entitled Getting Accountability Right with a Privacy Management Program, the Canadian privacy regulatory authorities set out expectations with respect to the role of the Privacy Officer, including that the Privacy Officer be sufficiently trained with resources dedicated for that purpose. Practically, it would be expected that a Privacy Officer would have a broad-based skill set, particularly with respect to compliance and risk management, as well as familiarity with the legal and regulatory frameworks under Canadian Privacy Statutes.

6.5 What are the responsibilities of the Data Protection Officer, as required by law or typical in practice?

The Privacy Officer is responsible under Canadian Privacy Statutes for ensuring compliance with applicable privacy law. In addition, there has been considerable regulatory guidance on specific requirements of the role of the Privacy Officer. Depending on the type and size of the organisation, Canadian privacy regulatory authorities expect the Privacy Officer to, among other things: design, establish and oversee a privacy management programme (including all training, monitoring, documentation, auditing, reporting and evaluation); establish and implement privacy programme controls and assess/revise programme controls as required; be involved in the review and approval process of new initiatives, services and programmes involving personal information; be fundamental to the applicable business decision-making processes of the organisation related to personal information processing; intervene on privacy issues relating to any of the organisation’s operations; and represent the organisation in the event of complaints or investigations.

6.6 Must the appointment of a Data Protection Officer be registered/notified to the relevant data protection authority(ies)?

There is no requirement to register or notify the Data Protection Officer with the relevant data protection authorities.
7 Marketing and Cookies

7.1 Please describe any legislative restrictions on the sending of marketing communications by post, telephone, email, or SMS text message. (E.g., requirement to obtain prior opt-in consent or to provide a simple and free means of opt-out.)

Postal marketing communications are not specifically regulated, but must comply with the requirements of Canadian Privacy Statutes. Telephone marketing in Canada is subject to the requirements of Canadian Privacy Statutes as well as the Canadian Radio-Television and Telecommunications Commission’s (“CRTC”) Unsolicited Telecommunications Rules. These rules include specific requirements related to the National Do-Not-Call List, telemarketing and the use of automatic dialling-announcing devices. See the response to question 7.3 below.

Telemarketing communications are subject to both the requirements under Canadian Privacy Statutes and Canada’s anti-spam legislation (“CASL”). In general, under CASL, it is a violation to send, or cause or permit to be sent, a commercial electronic message (defined broadly to include text, sound, voice or image messages) to an electronic address unless the recipient has provided express or implied consent (as defined in the Act) and the message complies with the prescribed form and content requirements, including an unsubscribe mechanism.

7.2 Is the relevant data protection authority(ies) active in enforcement of breaches of marketing restrictions?

Yes. The Canadian privacy regulatory authorities have issued multiple reports of findings related to secondary marketing practices. The CRTC is also active in enforcing the Unsolicited Telecommunications Rules.

7.3 Are companies required to screen against any “do not contact” list or registry?

With respect to telemarketing, under Canada’s Do-Not-Call List Rules (“DNCL Rules”), an individual may register their telephone or fax number on the National Do-Not-Call List (“National DNCL”) to indicate that they do not wish to receive unsolicited telemarketing communications. In general, organisations are prohibited from placing unsolicited telemarketing calls (telephone or fax) to numbers registered on the National DNCL unless express consent has been obtained directly from the individual in the manner prescribed under the DNCL Rules. Under the CRTC Telemarketing Rules, an organisation must maintain its own internal Do-Not-Call List and must not initiate telemarketing communications to an individual on its own list. With respect to postal mail, email or SMS marketing, an organisation must maintain its own “do not contact” list.

7.4 What are the maximum penalties for sending marketing communications in breach of applicable restrictions?

Under Canadian Privacy Statutes, there are no specific penalties related to the sending of marketing communications. However, organisations may be subject to a complaint and investigation. In Alberta, British Columbia, and Quebec, an investigation may be elevated to a formal inquiry resulting in an order. Failure to comply with an order can result in fines of up to $100,000 in Alberta and British Columbia. In Alberta and Quebec, organisations can also be subject to fines for failure to comply with the relevant requirements of the Acts of up to $100,000 in Alberta and $10,000 in Quebec for a first offence and $20,000 for a subsequent offence.

The CRTC is the agency primarily responsible for regulatory enforcement of the Unsolicited Telecommunications Rules. The CRTC has the legislative authority under the Telecommunications Act to impose administrative monetary penalties for violation of the Unsolicited Telecommunications Rules. The maximum administrative monetary penalty for each violation of the Unsolicited Telecommunications Rules is $15,000 for a corporation. A violation that continues for more than one day constitutes a separate violation for each day that it is continued. In addition, a person that contravenes any prohibition or requirement of the Commission related to the Unsolicited Telecommunications Rules may be guilty of an offence punishable on summary conviction and liable, in the case of a corporation, to a fine not exceeding $100,000 for a first offence or $250,000 for a subsequent offence. There is also a limited private right of action that allows a person to sue for damages that result from any act or omission that is contrary to the Telecommunications Act or a decision or regulations.

The CRTC is also the agency primarily responsible for regulatory enforcement. CASL permits the CRTC to impose administrative monetary penalties of up to $1 million per violation for individuals and $10 million for businesses. CASL outlines a range of factors to be considered in assessing the penalty amount, including the nature and scope of the violation. CASL also sets forth a private right of action permitting individuals to bring a civil action for alleged violations of CASL ($200 for each contravention up to a maximum of $1 million each day for a violation of the provisions addressing unsolicited electronic messages).

7.5 What types of cookies require explicit opt-in consent, as mandated by law or binding guidance issued by the relevant data protection authority(ies)?

There are no specific requirements with respect to cookies under Canadian Privacy Statutes. To the extent that cookies are deemed to process personal information, the full requirements under Canadian Privacy Statutes would apply. (See the response to question 7.6 below for Canadian privacy regulatory authority expectations with respect to cookies and online behavioural advertising.)

CASL sets out an express consent regime for the installation of “computer programmes” and deems cookies to be a type of computer program. CASL provides that a person is considered to expressly consent to the installation of a cookie when the person’s conduct is such that it is reasonable to believe that they consent to the cookie’s installation.

7.6 For what types of cookies is implied consent acceptable, under relevant national legislation or binding guidance issued by the relevant data protection authority(ies)?

In general, under Canadian Privacy Statutes, implied consent can be relied upon for the collection and use of personal information by cookies to the extent that the personal information involved is non-sensitive in nature.

The OPC has released guidance entitled Privacy and Online Behavioural Advertising. In this guidance, the OPC states that...
implied (or opt-out) consent is reasonable for the purposes of online behavioural advertising providing that:

- individuals are made aware of the purposes for the practice in a manner that is clear and understandable;
- individuals are informed of these purposes at or before the time of collection and provided with information about the various parties involved in online behavioural advertising;
- individuals are able to easily opt-out of the practice at or before the time the information is collected;
- the opt-out takes effect immediately and is persistent;
- the information collected and used is limited, to the extent practicable, to non-sensitive information; and
- information collected and used is destroyed as soon as possible or effectively de-identified.

8.2 Please describe the mechanisms companies typically utilise to transfer personal data abroad in compliance with applicable transfer restrictions.

Typically, companies enter into an agreement when transferring data outside of Canada for processing purposes in order to ensure that the data transferred is afforded an equivalent level of protection to that under Canadian Privacy Statutes. Depending on the size and context of the data transfer arrangement in question, there are a number of measures that companies would take to establish an appropriate vendor management framework, including: (i) due diligence, in particular with respect to security safeguards; (ii) contractual arrangements; (iii) appropriate notice to employees or consumers; and (iv) appropriate monitoring of the service provider arrangement.

8.3 Do transfers of personal data abroad require registration/notification or prior approval from the relevant data protection authority(ies)? Describe which mechanisms require approval or notification, what those steps involve, and how long they take.

Transfers of personal data abroad do not require registration/ notification or prior approval from the relevant data protection authorities.

9 Whistle-blower Hotlines

9.1 What is the permitted scope of corporate whistle-blower hotlines under applicable law or binding guidance issued by the relevant data protection authority(ies)? (E.g., restrictions on the scope of issues that may be reported, the persons who may submit a report, the persons whom a report may concern.)

There are no restrictions on the scope of corporate whistle-blower hotlines under Canadian Privacy Statutes. However, assuming that the calls will be recorded, Canadian Privacy Statutes will apply, as the recording of voice communications is considered a collection of personal information. Even if a caller does not provide his or her name, Canadian Privacy Statutes would likely apply as there may be other personal information provided during the call either through the content of the information provided by the caller or merely through the voice of the caller (accent, gender, ethnic origin, age, tone, etc.).

In essence, under Canadian Privacy Statutes, Canadian privacy regulatory authorities have stated that, at the beginning of the call, organisations must provide clear notice to individuals that the call is being recorded and the purposes for the recording. Canadian privacy regulatory authorities have also stated that in the event that the individual objects to the call recording, the organisation must provide an alternative method of communicating (i.e., not record the call or correspond online).

Organisations that are conducting the call recording must also ensure that they comply with the other requirements in Canadian Privacy Statutes with respect to the way in which they manage the personal information collected from call recordings, such as implementing reasonable safeguards, limiting retention, and providing individuals with access to their own call records.

9.2 Is anonymous reporting strictly prohibited, or strongly discouraged, under applicable law or binding guidance issued by the relevant data protection authority(ies)? If so, how do companies typically address this issue?

Anonymous reporting is not strictly prohibited or discouraged under Canadian Privacy Statutes.
### 10 CCTV and Employee Monitoring

#### 10.1 Does the use of CCTV require separate registration/notification or prior approval from the relevant data protection authority(ies)?

No. The use of CCTV does not require separate registration/notification or prior approval from the relevant data protection authorities.

#### 10.2 What types of employee monitoring are permitted (if any), and in what circumstances?

Employee monitoring would be permissible (both in the workplace and otherwise) provided that it is conducted in conformity with the principles under Canadian Privacy Statutes. In particular, the monitoring must be conducted for a purpose consistent with what a reasonable person would consider appropriate in the circumstances. Canadian privacy regulatory authorities generally use a four-part test to assist in determining the reasonableness of employee monitoring:

(i) Is the video surveillance demonstrably necessary to meet a specific need?

(ii) Is the measure likely to be effective in meeting that need?

(iii) Is the loss of privacy proportional to the benefit gained?

(iv) Is there a less privacy-invasive way that the employer could achieve the same end?

#### 10.3 Is consent or notice required? Describe how employers typically obtain consent or provide notice.

Yes. Consent (either express or implied, where permitted) is generally required for employee monitoring or surveillance. Although the specific requirements vary under Canadian Privacy Statutes, in the employment context, implied consent for the collection and use of employee personal information via monitoring would generally be appropriate when: (i) the employee personal information being collected is not sensitive; and (ii) the purpose of the video surveillance has been explained so that employees would reasonably expect that their information will be used for those purposes.

Employers typically provide notice about video surveillance or monitoring upon entry to the workplace area under surveillance or upon use of the technology being monitored. Employers also implement video surveillance and monitoring policies, and reference such activities in relevant privacy statements.

#### 10.4 To what extent do works councils/trade unions/employee representatives need to be notified or consulted?

There is no express requirement to notify trade unions regarding the use of video surveillance under Canadian Privacy Statutes.

#### 10.5 Does employee monitoring require separate registration/notification or prior approval from the relevant data protection authority(ies)?

Employee monitoring does not require separate registration/notification or prior approval from the relevant data protection authorities.

### 11 Processing Data in the Cloud

#### 11.1 Is it permitted to process personal data in the cloud? If so, what specific due diligence must be performed, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

Yes. It is permitted to process personal information in the cloud under Canadian Privacy Statutes. The same considerations set out in response to question 8.1 would apply when processing personal information in the cloud.

#### 11.2 What specific contractual obligations must be imposed on a processor providing cloud-based services, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

There are no specific contractual obligations that must be imposed on a processor providing cloud-based services under Canadian Privacy Statutes. There is an evolving set of provisions that Canadian privacy regulatory authorities would expect to be included in contracts with cloud-based or other service providers. These include, among other things: (i) limitations on collection, use, disclosure, access and other processing; (ii) appropriate information security governance; (iii) training and education for service provider employees with access to personal information; (iv) restrictions on sub-contracting; (v) audits; (vi) breach notification protocols; and (vii) data return, anonymisation or destruction requirements.

### 12 Big Data and Analytics

#### 12.1 Is the utilisation of big data and analytics permitted? If so, what due diligence is required, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

Yes. Assuming that the information in question is personal information, the use of big data and analytics would be permitted...
subject to the processes involved in complying with the requirements of Canadian Privacy Statutes. There are no specific requirements with respect to big data or analytics under Canadian Privacy Statutes and there has been no binding guidance on this issue to date. However, the OPC has focused on the privacy challenges inherent in big data processing, and is currently conducting a comprehensive consultation that is considering these issues (see the OPC’s discussion paper titled, A discussion paper exploring potential enhancements to consent under the Personal Information Protection and Electronic Documents Act).

13 Data Security and Data Breach

13.1 What data security standards (e.g., encryption) are required, under applicable law or binding guidance issued by the relevant data protection authority(ies)?

Each of the Canadian Privacy Statutes contains specific provisions relating to the safeguarding of personal information. In essence, these provisions require organisations to implement reasonable technical, physical and administrative measures to protect personal information against loss or theft, as well as unauthorised access, disclosure, copying, use, modification or destruction.

13.2 Is there a legal requirement to report data breaches to the relevant data protection authority(ies)? If so, describe what details must be reported, to whom, and within what timeframe. If no legal requirement exists, describe under what circumstances the relevant data protection authority(ies) expects voluntary breach reporting.

Currently, PIPA Alberta is the only private sector privacy statute with a data breach notification requirement. A breach notification requirement was included in recent amendments to PIPEDA, but it is not yet in force.

Under PIPA Alberta, an organisation is required to provide notice to the Commissioner without unreasonable delay of a breach where there is a real risk of significant harm to an individual. Notice to the Commissioner must be in writing and include the following information: (i) a description of the circumstances of the loss or unauthorised access or disclosure; (ii) the date on which, or time period during which, the loss or unauthorised access or disclosure occurred; (iii) a description of the personal information involved in the loss or unauthorised access or disclosure; (iv) an assessment of the risk of harm to individuals as a result of the loss or unauthorised access or disclosure; (v) an estimate of the number of individuals to whom there is a real risk of significant harm as a result of the loss or unauthorised access or disclosure; (vi) a description of any steps which the organisation has taken to reduce the risk of harm; and (vii) contact information for a person who can answer questions about the loss or unauthorised access or disclosure.

Under PIPA Alberta, the Commissioner may subsequently require organisations to notify affected individuals directly of the loss or unauthorised disclosure, unless the Commissioner determines that direct notification would be unreasonable in the circumstances. Such notification must include: (i) a description of the circumstances of the loss or unauthorised access or disclosure; (ii) the date on which, or time period during which, the loss or unauthorised access or disclosure occurred; (iii) a description of the personal information involved in the loss or unauthorised access or disclosure; (iv) a description of any steps which the organisation has taken to reduce the risk of harm; and (v) contact information for a person who can answer questions about the loss or unauthorised access or disclosure.

Once in force, PIPEDA will require an organisation to notify an individual of any breach of security safeguards involving the individual’s personal information under the organisation’s control if it is reasonable in the circumstances to believe that the breach creates a real risk of significant harm to the individual. The notification must be given as soon as feasible after the organisation determines that the breach has occurred. It must be conspicuous and given directly to the individual in the manner yet to be prescribed.

Under PIPEDA, when notice is given to individuals, it must also be given to any other organisation or government institution if the notifying organisation believes that the other organisation or the government institution may be able to reduce the risk of harm or mitigate that harm.

While there are currently no express data breach notification requirements under the remaining Canadian Privacy Statutes, findings and other guidance documents suggest that a duty to notify affected individuals is implicit within the general safeguarding requirements under Canadian Privacy Statutes in circumstances where material harm is reasonably foreseeable, and such notification would serve to protect personal information from further unauthorised access, use or disclosure.

13.3 Is there a legal requirement to report data breaches to individuals? If so, describe what details must be reported, to whom, and within what timeframe. If no legal requirement exists, describe under what circumstances the relevant data protection authority(ies) expects voluntary breach reporting.

13.4 What are the maximum penalties for security breaches?

Under PIPEDA, a failure to notify the Commissioner is an offence. A person who commits an offence is liable, in the case of an individual, to a fine not exceeding $10,000, and in the case of a person other than an individual, to a fine not exceeding $100,000.

Under PIPEDA, failure to comply with the breach notification provisions under PIPEDA will be an offence under the Act punishable on summary conviction liable to a fine not exceeding $10,000, or as an indictable offence liable to a fine not exceeding $100,000.
14 Enforcement and Sanctions

14.1 Describe the enforcement powers of the data protection authority(ies).

<table>
<thead>
<tr>
<th>Investigatory Power</th>
<th>Civil/Administrative Sanction</th>
<th>Criminal Sanction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Investigations &amp; Orders</td>
<td>The privacy regime in Canada is primarily complaint-based and Canadian privacy regulatory authorities have an express obligation to investigate complaints, and have the authority to self-initiate an investigation. Under PIPEDA, a formal complaint must be investigated and the OPC will issue a Letter of Finding, a report outlining the Findings of the investigation and, if applicable, recommendations for compliance. A Letter of Finding may be made public at the discretion of the OPC. A complainant (but not the organisation subject to the complaint) may appeal to the Federal Court and the Court has broad authority including ordering a correction of the organisation’s practices and awarding damages to the complainant, including damages for any “humiliation” that the complainant has suffered. Under PIPA Alberta and PIPA BC, an investigation may be elevated to a formal inquiry by the Commissioner resulting in an order. Organisations are required to comply with the order within a prescribed time period, or apply for judicial review. In both British Columbia and Alberta, once an order is final, an affected individual has a cause of action against the organisation for damages for loss or injury that the individual has suffered as a result of the breach. Similarly, under the Québec Privacy Act, an order must be obeyed within a prescribed time period. An individual may appeal to the judge of the Court of Québec on questions of law or jurisdiction with respect to a final decision.</td>

14.2 Describe the data protection authority’s approach to exercising those powers, with examples of recent cases.

Canada has one of the most active privacy regulatory enforcement arenas in the world. In particular, the OPC and the provincial privacy regulatory authorities in the provinces of Alberta and British Columbia have been very active in investigating privacy complaints (including complaints into companies such as Facebook and Google), as well as publishing guidance and research on a range of emerging privacy issues. More recently, there has been an increasing trend of Canadian privacy regulatory authorities self-initiating investigations and audits.

In light of the formal arrangements entered into by Canadian privacy regulatory authorities, there have also been joint investigations within Canada and with foreign data protection authorities and the OPC.

15 E-discovery / Disclosure to Foreign Law Enforcement Agencies

15.1 How do companies within your jurisdiction respond to foreign e-discovery requests, or requests for disclosure from foreign law enforcement agencies?

Although the language varies across the statutes, in general, under Canadian Privacy Statutes, there is generally an exception to the consent requirement when disclosing information (i) to comply with the rules of court relating to the production of records, and (ii) where required by law.
When disclosing personal information in either of these contexts, the remaining requirements under Canadian Privacy Statutes still apply. As such, organisations must only disclose the personal information in the manner and to the extent to which a reasonable person would consider appropriate in the circumstances, must limit the amount of personal information that is disclosed to that which is reasonably necessary in the circumstances, and must appropriately safeguard the transmission of personal information.

The OPC also expects organisations to be open and transparent when transferring data across borders, in order that it may be accessed by the courts, law enforcement and national security authorities in those jurisdictions.

15.2 What guidance has the data protection authority(ies) issued?

The OPC has released guidance entitled Guidelines for Processing Personal Information Across Borders which addresses lawful access by foreign authorities.

The OPC has also released guidance entitled PIPEDA and Your Practice: A Privacy Handbook for Lawyers which addresses privacy issues associated with e-discovery.

16 Trends and Developments

16.1 What enforcement trends have emerged during the previous 12 months? Describe any relevant case law.

Canada has one of the most active privacy regulatory enforcement arenas in the world. In particular, the OPC and the provincial regulatory authorities in the provinces of Ontario, Alberta and British Columbia have collectively been very active in investigating privacy complaints, and publishing guidance and research on a range of emerging privacy issues.

Over the last few years, there has been an increasing trend of Canadian privacy regulatory authorities self-initiating investigations and audits.

In addition, by virtue of a series of formal arrangements entered into by Canadian privacy regulatory authorities and their data protection authority counterparts in foreign jurisdictions, there is an increasing risk that a privacy issue which arises in Canada may also come under privacy regulatory scrutiny in another jurisdiction. In 2016, the OPC conducted a joint investigation with the Australian Privacy Commissioner regarding a security incident involving the compromise of the adult dating website, Ashley Madison. The OPC and provincial regulatory authorities have also been involved in the proactive online privacy sweeps of the Global Privacy Enforcement Network (“GPEN”).

16.2 What “hot topics” are currently a focus for the data protection regulator?

Canadian privacy regulatory authorities are currently focused on the privacy issues associated with digital advertising. As set out in the response to question 7.5, the OPC has issued guidance entitled Privacy and Online Behavioural Advertising, has recently released multiple decisions addressing digital advertising and online behavioural advertising (“OBA”), has published a report of research it has conducted on the topic, and is currently conducting investigations regarding the OBA practices of several organisations.

The OPC has also been increasingly focused on exploring how the concept of ethics can be integrated into an organisation’s assessment of fair, reasonable and legitimate processing of personal information. Data ethics was expressly considered as part of the OPC’s recent consultation on consent (see response to question 12.1 above), and the OPC recently funded an Information Accountability Foundation project entitled “Big Data Ethics Initiative: Assessment for Canadian Organizations”.

The CRTC has been actively enforcing the commercial electronic message provisions in CASL. The CRTC has issued an administrative monetary penalty of $1,100,000 to a company for sending commercial electronic messages without consent and which contained an unsubscribe mechanism that did not function properly, entered into four undertakings regarding potential CASL violations that included payments to the CRTC ranging from $48,000–$200,000, and one compliance and enforcement decision with an administrative monetary penalty of $50,000. Furthermore, the enforcement of CASL by the private sector is anticipated when the private right of action under CASL comes into force on July 1, 2017.
Adam is an acknowledged Canadian legal industry leader in privacy and data management; he co-leads the firm's national Privacy and Data Management Group. Adam has been lead counsel on many of the most significant privacy matters in Canada. He advises Fortune 500 clients in their business-critical data protection issues, compliance initiatives and data governance. He regularly represents clients on regulatory investigations and security breaches.

Adam is Special Counsel to the Interactive Advertising Bureau of Canada and Counsel to the Digital Advertising Alliance of Canada. He has extensive experience in the privacy law area and regularly advises Chief Privacy Officers, in-house counsel and compliance professionals in the private, health, public and not-for-profit sectors on managing security incidents, privacy regulatory investigations, anti-spam law compliance, privacy and security reviews/audits, privacy policies, practices and procedures, privacy compliance initiatives, and service provider arrangements involving personal information, including trans-border data flows.
